INTRODUCING OUR AGENT OF CHANGE – CREDIT UNION CHECKING

A checking account at your credit union is not just a checking account. It's an access point to other financial services that will revolutionize the way you do banking. Gone are the days of paper checks and waiting in line for deposits. With a credit union checking account you'll receive the tools you need to streamline your finances. AND that means more time for you.

With convenience service like check cards, home banking and electronic bill payment services you'll be able to manage your checking account, deposits, and bill paying right from your home or office.

When you open a checking account at the credit union you get access to:

Audio Response System

When you open a checking account with us you'll have 24-hour access to your account with audio response. Turn any touch-tone phone into a credit union branch with the press of a button. Just enter your account number and personal identification number (PIN) and you're on your way.

Home Banking

Do your banking from home with the credit union's home banking system. All you need is a computer and an Internet connection. Just log onto our website and click on the home banking button. Enter your account number and PIN and you're on your way.

Check Card

It's the card that works like a check – the convenient and easy to use credit union check card. Use the check card wherever you use your credit card. Funds are automatically withdrawn from your checking account so you pay no interest.

You'll also receive:

- Unlimited check writing
- No minimum balance required
- No monthly service charge
- Overdraft Protection

With lower (or NO) monthly service charges, no minimum balance requirements and interest-bearing checking accounts, when you switch over to credit union checking, you'll save more money. No more fees and other charges you'd typically pay at other financial institutions. We put more money in your pocket – so make the change to credit union checking.

Checking that can change your life!
